

MOSNUR AHMED

Mid-level Software Engineer · Mobile & Full-Stack

Middle Badda, Dhaka, Bangladesh • +880 1981 916908 • mosnurahmed01@gmail.com
linkedin.com/in/mosnurahmed • github.com/mosnurahmed • my-portfolio-front-end-three.vercel.app

PROFESSIONAL SUMMARY

Mid-level software engineer with 2+ years of experience designing and shipping production-grade mobile and web applications. Owns end-to-end execution: system architecture, implementation, code review, release engineering and post-launch monitoring. Deep expertise in React Native, React, Next.js, TypeScript, and the MERN stack. Proven track record of modernizing legacy codebases, cutting feature delivery time by 40%, and delivering apps used by real customers on the Google Play Store.

TECHNICAL SKILLS

Languages : TypeScript, JavaScript (ES6+), Python, Java
Mobile : React Native, Expo, Redux Toolkit, RTK Query, Flutter, Native Modules, Push Notifications, Deep Linking, Biometric Auth
Frontend : React, Next.js, Redux, Tailwind CSS, Framer Motion, Three.js, HTML5, CSS3, Bootstrap
Backend : Node.js, Express.js, REST APIs, JWT, WebSockets
Databases : MongoDB, Mongoose, MySQL
DevOps : Git, GitHub, GitHub Actions, CI/CD, Vercel, Firebase, Postman, Play Console, ESLint, Prettier, Husky, Figma
Practices : System Design, Code Review, Agile/Scrum, TDD, Performance Optimization, Release Management

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – MOBILE (REACT NATIVE) — Byte Trek Limited

Sep 2024 — Present

Dhaka, Bangladesh

- Drove the mobile product surface for Byte Trek's flagship apps Amarhaalkhata (fintech ledger) and SignatureCare (health-services), owning end-to-end execution from system design to release.
- Designed mobile app architecture with modular feature layout, typed API contracts, and a normalized Redux Toolkit + RTK Query data layer with offline-first cache and conflict-safe sync.
- Established engineering foundations including TypeScript strict mode, ESLint/Prettier, Husky pre-commit hooks, environment-based config, and a CI build pipeline.
- Built a reusable component system (design tokens, primitives, form layer) that cut feature delivery time by ~40% across the team.
- Integrated Node.js + Express + MongoDB backend via JWT auth with refresh-token rotation, role-based access control, and audit trails for financial events.
- Shipped secure payment flows, deep linking, push notifications, biometric login, and crash/analytics observability with Crashlytics and Firebase Analytics.
- Modernized the legacy SignatureCare app: achieved 16 KB page-size compliance, upgraded target API to level 35 (Android 14+), upgraded React Native core and 40+ libraries, removed deprecated APIs, and re-released cleanly to the Play Store.
- Owned release management — versioning, signed builds, staged Play Store rollouts, crash tracking — and mentored junior engineers via code review and architectural design docs.

Tech: React Native, TypeScript, Redux Toolkit, RTK Query, Node.js, Express, MongoDB, JWT, Firebase, CI/CD

JUNIOR SOFTWARE ENGINEER — Edusoft Consultant Ltd. Jan 2024 — Aug 2024

Dhaka, Bangladesh

- Modernized a portfolio of education-sector software products, delivering responsive, data-rich dashboards consumed by university clients.
- Refactored 5 legacy applications for full responsiveness, driving measurable lifts in user engagement and retention.
- Built a dynamic HTML/JavaScript reporting engine adopted by Bangladesh University of Professionals (BUP), Bangabandhu Sheikh Mujibur Rahman Maritime University (BSMRMU), and University of Asia Pacific (UAP).
- Improved page-load performance and interactivity, contributing directly to revenue growth.

Tech: HTML5, CSS3, JavaScript, Bootstrap, .NET

MOBILE APP DEVELOPER (PART-TIME) — RexioTech Aug 2023 — Dec 2023

Remote

- Designed and shipped student-facing modules for a Madrasha Management System used by educational institutions.
- Built the Student Fees module end-to-end with payment integration and receipt generation.
- Implemented the Student Result module with offline cache and PDF export.

Tech: React Native, TypeScript, Tailwind CSS

SELECTED PROJECTS

Amarhaalkhata — Digital Ledger for Small Businesses 2024 — Present

- Production fintech app at Byte Trek; replaces paper khata-books for SMEs in Bangladesh, with multi-language UI, secure payments, automated due-collection reminders, offline-first sync, and bank-grade auth.

Live: play.google.com/store/apps/details?id=com.amrhalkhata

Stack: React Native, TypeScript, Redux Toolkit, Express, MongoDB

SignatureCare — Health-Services App Modernization 2025

- Inherited a 2022 React Native codebase and brought it to current Play Store standards — 16 KB page-size compliance, target API 35, RN core + 40+ libraries upgraded, deprecated APIs removed, navigation and auth refactored.

Live: play.google.com/store/apps/details?id=com.rn_ercare24_app

Stack: React Native, Android API 35, Migration, Performance

LifeTrack Pro — Personal Life-OS 2025

- Self-owned product — cross-platform productivity app for habits, finance, and goals with offline sync, biometric security, and rich analytics; owned full architecture from zero to launch.

Stack: React Native, TypeScript, Redux, Express, MongoDB

PUBLICATIONS

A Framework of Vehicle Usage Optimization for Tour Purpose. MDPI Applied Sciences, 2023.

Authors: Nusrat Jahan Sarna, Mosnur Ahmed, Farzana Ahmed Rithen, Dr. Md. Motaharul Islam.

Link: mdpi.com/2076-3417/13/19/10973

Proposes a framework optimizing bus-seat occupancy, offering guide-inclusive bundled tour packages, and providing a tourist information portal — reducing travel cost and improving fleet utilization for operators.

EDUCATION

B.Sc. in Computer Science & Engineering — United International University Feb 2019 — Sep 2023

- Final-year capstone published in MDPI Applied Sciences.
- Specialized in Software Engineering and Mobile Computing.

LEADERSHIP & ORGANIZATIONS

UIU Computer Club — Executive Member

Feb 2020 — Sep 2023

UIU Debate Club — Executive Member

May 2019 — Jul 2022
